5. Fire Fighting Measures

Flammable properties The product is combustible, but not flammable.

Extinguishing media

Suitable extinguishing media Water fog. Carbon dioxide (CO₂). Dry chemical. Foam.

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Protection of firefighters

Protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Use water spray to cool unopened containers. Cool containers with flooding quantities of water until well after fire is out.

Hazardous combustion products Carbon oxides.

6. Accidental Release Measures

Personal precautions Ensure adequate ventilation. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid contact with skin. See Section 8 of the MSDS for Personal Protective Equipment.

Environmental precautions Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.

Methods for cleaning up Remove sources of ignition. Beware of the explosion danger. Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible.

Small Spills: Absorb spillage with non-combustible, absorbent material.

Large Spills: Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal.

7. Handling and Storage

Handling Wear appropriate personal protective equipment. Provide adequate ventilation. Avoid contact with eyes, skin, and clothing. Do not taste or swallow. Wash thoroughly after handling.

Storage Do not handle or store near an open flame, heat or other sources of ignition. Protect against direct sunlight. Store in tightly closed original container in a dry, cool and well-ventilated place. Keep away from food, drink and animal feeding stuffs. Store away from incompatible materials. Avoid uncoated metal containers. Minimize exposure to air.

8. Exposure Controls / Personal Protection

Occupational exposure limits

Canada. Ontario OELs. (Control of Exposure to Biological or Chemical Agents)

Components	Type	Value
Hexyl Acetate (142-92-7)	TWA	294 mg/m ³ 50 ppm

Engineering controls Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal protective equipment

Eye / face protection Wear safety glasses with side shields (or goggles).

Skin protection Wear chemical-resistant gloves, footwear and protective clothing appropriate for risk of exposure. Contact glove manufacturer for specific information.

Respiratory protection In case of inadequate ventilation use suitable respirator.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
