

BIO-CLEANING & DEODORIZING URINAL BLOCKS

Unique formula that cleans, de-scales and eliminates odors. Gradually disperses a bacterial culture without any accumulations in the drains. Dissolves completely in water. Combination of protease enzymes, beneficial micro-organisms, and a blend of surfactants for superior effectiveness. Urine and excessive flushing deposits calcium, salt and silica as scale. Bacteria and scale continue to build up until they form virtually insoluble lumps of uric scale, which is the chief source of offensive odors in urinals. Uric scale also creates unsightly

stains and can grow large enough to block pipes. By using ES 230, microbes attach to uric scale deposits converting them to more soluble compounds.

DIRECTIONS:

Place a block in urinal.
Effective for approximately 2,000 flushes.

SIZES:

Available in: 12 x 110g blocks with screens
22 x 110g blocks without screens

PACKAGING

Wherever possible, bottles and pails made from recycled plastic (10 - 25%). Can be recycled where facilities exist. Boxes made from recycled cardboard (94 - 100%).

BIODEGRADABILITY

(Decomposition of organic substances into carbon dioxide, water, and other harmless substances.) Rapid biodegradation reduces impact on the environment and food chain. All organic cleaning ingredients in these formulas are readily biodegradable per OECD Test 301D.

HEALTH & SAFETY

No ingredient found on major regulatory lists. Non-flammable and non-corrosive at use dilution.

NATURAL RENEWABLE RESOURCES

Wherever possible, we use only naturally-based, renewable ingredients, such as grains, corn oil, palm kernel oil, coconut oil, sugar cane juice & glucose.

TOXICITY

Acute Oral/Dermal Product considered essentially non-toxic according to WHMIS regulations.

AQUATIC TOXICITY

Product exceeds recognized acute toxicity standards for fish, invertebrate and algae at use dilution.

Certified Urinal Block CCD-165
