

## BIO-ACTIVE SUPER FLOOR DEGREASER

A biological product specially formulated to digest oils, grease and other dirt on floors. Leaves an invisible film which continues to digest the oils and grease even after regular cleaning. In-depth cleaning of floors leaving them cleaner, less slippery and with less malodors. A powerful mixture of nutrients, stimulants and surface agents for excellent performance.

- Many chemical products clean floor surfaces, but they don't provide the residual cleaning effects of microbes. The microorganisms in Enviro-Solutions cleaning products go to work after the initial cleaning is done. They penetrate into cracks and crevices of floor surfaces to degrade and digest spills, grease, and other accumulated material leaving floors truly cleaner.
- Common applications include cleaning floors for quick service, restaurants, school and industrial cafeterias, long term care and hospitals, grocery store floors (behind the counter) and floors in food processing plants
- Displaces unknown, potentially "pathogenic" (disease causing) bacteria with known, healthy microorganisms and in this way contributes to better human health
- While not an insecticide, a side benefit is that it eliminates the feeding and breeding sources for pests (insects)
- Moisture is a limiting factor and accumulated organics may not be removed in one washing. With routine cleaning, the effect is enhanced with each application until floors are truly deep cleaned

- Will show results within the first week. Lifting the old grease up is the first sign that it is working. The enzymes work to break apart the build-up of grease on the floor and grout. Brushing the floor with a deck brush once a week helps to accelerate the cleaning process. By the third week, you will notice a significant improvement in the floor's appearance and employees will notice improved traction (less slippage) than before

### DIRECTIONS:

#### General:

1. Before use, thoroughly clean the container, (eg. pails, mop buckets or spray bottles) while always using new, or dedicated to this product, cleaning supplies such as a mop head or towel.
2. Mix proper dilution and fill the container. Stir well.
3. Do not add bleach to the product or other cleaning agents.
4. Food contact surfaces have to be rinsed with potable water. Do not store in food processing areas or food storage areas. Do not contaminate food products.

#### In-Depth Degreasing:

Dilute 1 part to 200 parts (0.6 oz/gallon) cool water. Flood mop area. Scrub/brush solution into joints, crevices, grout lines, etc. Let it penetrate for 15 minutes. Pick up with wet vac or auto scrubber. If necessary, rinse with clean solution of ES 680C.

#### Daily Maintenance:

Dilute 1 part of product in 400 parts of cool water (0.3 oz/gallon) for regular use; 1:200 for heavy duty cleaning; and 1:450 for light duty cleaning. Apply with wet mop. Let stand for 5 minutes. Mop floor to pick up excess solution.

#### SIZES:

- 4.0 L (1.058 U.S. gallons)
- 1.89 L (0.50 U.S. gallon)
